

# FUCHS/FOX 2

## ARMoured NBC RECONNAISSANCE SYSTEM

Packed with built-in state-of-the-art detection equipment, Rheinmetall Defence's Fuchs/Fox armoured NBC reconnaissance system can quickly determine the presence of nuclear, biological and chemical contamination on the ground and in the air, covering large areas. Rugged and reliable, this amphibious, all-terrain armoured vehicle is able to conduct its mission even in the toughest terrain. Nearly 300 of these systems are now in service with customers worldwide, including the armed forces of Germany, the US and UK, the Netherlands, Norway, Saudi Arabia and the United Arab Emirates. They have already proven highly effective in numerous operations.

### Key Characteristics

- Carrier vehicle is the Fuchs/Fox 2 armoured transport
- Integrated equipment for detecting weaponized NBC agents
- Controlled by central computer system
- Reports i. a. w. ATP 45
- Command system for NBC reconnaissance
- NBC collective protection and air conditioning
- Modular protection from mines and IEDs
